01 | ABOUT US

Company Overview

ENRM Associates (K) Ltd is a registered Kenyan company (CR. No. PVT-7LU58YZL) specializing in environmental and natural resource management. Committed to sustainable development, we actively work to integrate environmental conservation with economic and social growth.

Our mission is to harmonize environmental and natural resource aspects in alignment with global Sustainable Development Goals (SDGs), ensuring long-term sustainability and resilience.

OUR VISION

A sustainable and resilient environment for future generations.

OUR MISSION

To promote evidence-based environmental governance through research, innovation, and stakeholder engagement.

02 | WHAT DRIVES US

Our Core Values

At the heart of our operations are five core values that guide every project and partnership.

1	**Integrity**	Upholding the highest ethical standards in all our engagements.
2	**Innovation**	Applying creative, science-based solutions to complex environmental challenges.
3	**Collaboration**	Partnering with communities, governments, and businesses to drive sustainable impact.
4	**Sustainability**	Ensuring that our work today secures the environment for tomorrow.
5	**Scientific Excellence**	Relying on rigorous data and evidence-based methodologies.

03 | WHAT WE DO

Our Services

We provide end-to-end environmental consulting, from baseline surveys and strategic planning to decommissioning and landscape restoration.

1 Feasibility Assessments & Baseline Surveys

We provide comprehensive institutional support through meticulous feasibility assessments for new and existing projects. Using the Feasibility Analysis Framework (FAF) and DAC/OECD standards, we evaluate relevance, effectiveness, efficiency, impact, sustainability, coherence, complementarity, and value-for-money (VfM). We also conduct baseline surveys assessing landscape analysis, biodiversity, and socio-economic factors.

2 Environmental & ENRM Planning

Our associates craft a diverse array of management plans for environmental and natural resources, including County Spatial Plans (CSPs), environmental management plans (EMPs), ecosystem-based management plans, and site-specific plans such as conservancy management plans.

3 Capacity Building

We deliver professional training programs for individuals and institutions across sectors, notably private industry, focused on Strategic Environmental Assessment (SEA), Environmental Impact Assessment (EIA), internal environmental audits, and Corporate Biodiversity Management (CBM).

4 Project Decommissioning Services

We address a significant gap in sustainable decommissioning of degraded sites linked to mining and infrastructure projects (roads, railways, ports), particularly borrow pits and quarries, by crafting and executing comprehensive project decommissioning plans.

5 Landscape Restoration

We craft strategies to rejuvenate degraded environments and restore natural resources, devising integrated, adaptable, and impactful approaches tailored to each landscape. We conduct restoration opportunity assessments using tools such as the WRI Rapid Restoration Diagnostic Tool.

6 Waste Care Services

We support institutional waste management in Kenya, covering waste handling, disposal, and recycling along the business chain in line with circular economy principles, with emphasis on areas lacking robust waste management infrastructure.

7 Integrated Environmental Assessments & Audits

We use a comprehensive toolkit for managing project impacts: avoidance, minimization, restoration, and offsets, through strategic environmental assessments (SEAs), environmental impact assessments (EIAs), and environmental audits (EAs). Our approach adheres strictly to the Environmental Management and Coordination Regulations of 2003 (revised 2018), and World Bank/IFC Environmental and Social Framework (ESF) safeguards and standards.

04 | TRACK RECORD

Featured Engagements & Impact

Our portfolio features strategic partnerships and field operations across Kenya.

SEA for Amboseli

Completion of the Strategic Environmental Assessment of the land sub-division plans for Eselenkei and Mbirikani group ranches in Amboseli, in partnership with the Big Life Foundation.

WWF Scoping SEA Validation Workshop

Facilitating the scoping SEA validation workshop for the Kilifi County Spatial Plan in Kilifi Town, North Coast.

Ndakaini Dam

Contributing to the integration of environment and natural resources in the realization of the global SDGs.

Hydrological Fieldwork

Extensive field operations, such as hydrological fieldwork in Kiboko River, Makueni County.

05 | OUR APPROACH

Standards & Frameworks

- Sustainable Development Goals (SDGs)
- DAC/OECD Evaluation Standards
- Feasibility Analysis Framework (FAF)
- WRI Rapid Restoration Diagnostic Tool
- EMCA Regulations 2003 (revised 2018)
- World Bank/IFC ESF Safeguards

ENRM NATURE SOLUTIONS

Premium Activated Carbon

Beyond consulting, we provide tangible environmental solutions: high-quality impregnated activated carbon, produced through an innovative natural process that delivers superior filtration performance for both households and industries across Kenya.

Natural Production

- Sustainable Acacia hardwood charcoal
- Enhanced with volcanic ash impregnation
- Purified through high-temperature steam sterilization

Proven Applications

- Domestic water purification systems
- Industrial wastewater treatment
- Air filtration
- Environmental remediation

Availability

- Distributed from our hubs in Nairobi, Kitengela, and Naivasha
- Free delivery available

PACKAGING | AVAILABLE IN

1 kg | **5 kg** | **25 kg** | **50 kg**

GET IN TOUCH

Let's Partner for Sustainable Impact

We believe in collaboration for sustainable impact. Whether you are a government agency, non-profit, private sector company, or community group, we welcome partnerships to scale our environmental initiatives.
